

JP PISTONS

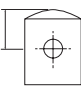

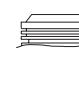

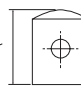

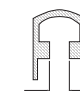

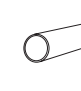

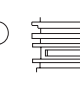

New Special Piston range

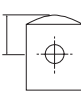

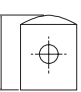

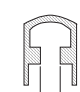

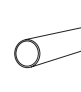

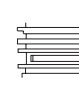

Over recent years a number of pistons that do not appear in the JP Pistons catalogue have been manufactured for customers. Some of these have been reordered and are now available to all. As expected, the list is varied and includes pistons for cars, motorcycles and trucks. The pistons will be on offer under the 'Special pistons' range with the prefix 'SP' rather than 'JP'. If there is continued interest in the pistons then they may move into the regular catalogue.
